Subject Index Volume 61 (1991)

acid-base purification, 239
antiport, 227
aqueous-organic mixtures, 31
artificial kidney, 279

Bacillus stearothermophilus, 167
bacterial cell surface layers, 167
bacteriorhodopsin, 325
biocompatibility, 289
biomedical membranes, 289
biomembrane analogs, 227, 325
biomimetic membranes, 253
biosynthetic membranes, 325
bipolar membranes, 239

cation-exchange membrane, 227
cell recycling, 303
cellulose acetate membranes, 49
chitosan membrane, 279
chloromethanes, 85
collagen film, 269
composite membranes, 1, 19, 215
composite membrane, metal oxide based, 157
concentration polarization, 177
continuous culture, 303
coupled transport, 191
coupled, facilitated transport, 227

diffusion, 177

economics, 113
electrochemistry, 157
electrodialysis, 117, 239
ethylene propylene rubber, 99

film theory, 49
fluorocarbon films, 289
food technology, 269

gas separations, 1
gold sol method, 73

hemocompatibility, 289
heparin, immobilization of, 253
hollow fiber membrane, 315
2-hydroxy-3-(trimethylammoniumchloride)propyl-cellulose, partially substituted, 253

inorganic membranes, 215
ion-exchange membranes, 177, 191

liposomes, 325

mass transfer, 49
membrane reactor, 315
membrane preparation and structure, 1, 19, 131, 289
membrane-bound enzymes, 325
modified cellulose membrane, 315

n-butyl oleate, synthesis of, 315
nuclear acid bases, 227

permeant/carrier complexes, 191
permporometry, 73
pervaporation, 19, 31, 65, 99, 269
plasma polymerized membranes, 289
platelet adhesion, 253
poly(butadien-styrene), 1
poly(2,6-dimethyl-,1,4-phenylene oxide) membrane, 73
poly (dimethylsiloxane), 1, 85, 99
poly(ethersulfone) membrane, 1
poly(ethersulfone)/poly(dimethylsiloxane) composite membranes, 19
poly(styrene sulfonic acid), 227
poly(vinyl alcohol), 227
poly(vinyl chloride) membranes, 131
polymer structure design, 65
polyoctenamer, 99
polysulfone membrane, 289
polyurea–polyurethane membranes, 65
pore size, 73
pore flow model, 49
pore-size distribution, 279
porosity, 73
Propionibacterium acidi-propionici, 303
propionic acid, 303

separation of ethyl alcohol/water, 65
skin thickness, 73
sorption and permeation, 85
surface characterization, 289
surface modification, 289
symport, 227

theory, 99

ultrafiltration, 131, 167, 215
ultrafiltration, mass transfer in, 49
ultrafiltration membrane, 303
ultrafiltration membrane, anisotropic, 73
urease, immobilized, 279

vapour permeation, industrial application of, 113
volatile organics, removal of, 99
